Unknown	4,914	27.94%				Contact	5,934	33.74%
						Unknown	11,588	65.88%

COVID 19 Guidance:

Social and Physical Distancing - keeping space between yourself and other people who do not live with you. To practice social and physical distancing:

- Stay at least 6 feet from people who are not part of your household
- Avoid hand shaking or high fives
- Avoid social gatherings of any kind with others outside your household
- Avoid crowded spaces and mass gatherings

Wearing Face Coverings or Face Mask - the wearing a cloth face covering (masks) by individuals is strongly encouraged. This reduces the risk of spreading COVID-19 if someone is asymptomatic or pre-symptomatic. Avoid touching your face and eyes.

Hand Washing - Frequently washing your hands with soap and water for 20 seconds helps to remove the virus from your hands. If soap and water are not available and your hands are not visibly soiled, hand sanitizer that contains at least 70% alcohol can be used.

Disinfecting Surfaces - Regularly disinfecting surfaces with soap and water or EPA-registered household disinfectants (including bleach and cleaners containing at least 60% alcohol) helps to prevent transmission of the virus from droplets that may have settled on surfaces or have transferred to commonly used surfaces through touch.

Stay Home If Sick or Instructed to Isolate/Quarantine by a Medical or Public Health Professional - If you are sick or have been instructed to stay home by a medical professional, stay home. Symptoms of COVID19 vary. Call your medical provider if you have symptoms or believe you have been exposed to the virus. If you do not have a doctor or medical provider, call 2-1-1.

COVID-19 Symptoms Include: Fever or chills, Cough, Shortness of breath or difficulty breathing, Fatigue, Muscle or body aches, Headache, New loss of taste or smell, Sore throat, Congestion or runny nose, Nausea or vomiting, and Diarrhea.
